INTRODUCTION

Tiger aims to make decentralized finance completely secure and to provide the most secure payment system to multinational companies and organizations, including investors, around the world, allowing them to easily and securely transact digital transactions using blockchain technology and be able to own their valuable assets.

Tiger is a Transaction driven Decentralized Cryptocurrency based on the goal that it will be the safest Global Digital Currency in the world and will be used worldwide as a payment method. A digital currency that is created for secure online payments , NFTS , staking , gaming , banking , apps , businesses , organisations and p2p. Tiger has been launched as a multipurpose cryptocurrency which will be owned by 'You'.

PROBLEMS AND SOLUTIONS

Risk in Cryptocurrencies

There are many risks involved in other cryptocurrencies. We understand this and have the skills, experience, and leadership to overcome them.

SMART CONTRACT

While there are many functions in the smart contract code of many other Cryptocurrencies that allow the owners of cryptocurrencies to own valuable assets of the common people and to the detriment of investors, on the other hand in Tiger(CUB) Various important steps have been taken to make it 100% safe from such errors.

Not only Tiger(CUB) smart contract is audited, but all the functions in contract are designed to make Tiger(CUB) 100% the most secure digital currency, and Decentralized finance.

While keeping this in mind, the ownership of Tiger(CUB) smart contract, which is deployed to the Binance Smart Chain, has been renounced so that no one can change its functions in the future. In other words, we have renounced ownership to protect the investors and to gain trust.

THE TEAM

Tiger (CUB) doesn't have a CEO, nor is it controlled by any individual, organization, entity, or group, except the founder . But Tiger is the first Digital Currency in the world created for multiple use cases of online payments. All the investors who have bought and held Tiger are the real Tiger team members. This door is open for every investor that he can invest in Tiger(CUB) and can count himself as the owner and team in Tiger

HOW AND WHY INVESTORS OWN TIGER COIN ?

Further clarification regarding the Tiger team

There are many risks involved in other cryptocurrencies. We understand this and have the skills, experience, and leadership to overcome them.

The basic and important role of any cryptocurrency is its supply; the one who has the most supply of the Cryptocurrency is the real owner of the Cryptocurrency. In Tiger the Investors , founder , shareholders are the real owner of Tiger(CUB) those who invested early will have a huge amount of **CUB's supply**. The one with most supply of CUB'S actually owns Tiger.

Majority of CUB'S will be bought into circulation in a step-by-step manner keeping in mind the best interest of investors , this will help control the price of Tiger and also prevent major fluctuations.

Whenever an investor buys any cryptocurrency, his asset goes into the liquidity pool and in return, the buyer is given cryptocurrency coins and according to the principle of demand and supply that is why the value of coins also increases. On the other hand, if someone sells cryptocurrency, the coins sold go back to the liquidity pool and in return, the seller gets the assets back from the liquidity pool. That is, all the assets of the buyers of cryptocurrency go to the liquidity pool and the one who has the most supply is the owner of the assets in this liquidity pool and he is the one who controls the price of the cryptocurrency.

Tiger has a supply of 100 billion which cannot be increased and majority of the supply is owned by founder wallet which will be released gradually into Liquidity pool.

The development team has major share of Tiger (CUB) which will be used to create and deploy DApps for Financial Industry, keeping in mind intense GPU requirements for AI apps and web 3.0 apps

www.tiger.us.org

info@tiger.us.org

The main reason behind Tiger(CUB) development is to convince early adopters of Tiger for financial transactions and secure payments.

The Official Tiger(CUB) Website development is complete for promoting marketing efforts in attracting early investors.

You can visit tiger.us.org for further updates and press releases

Investors are the sole owners of the assets in the liquidity pool, Tiger(CUB) are Liquidated using pancakeswap investors can visit www.tiger.us.org and swap any Crypto for Tiger (CUB) .

**Further Liquidity will be added trough Pancakeswap,Uniswap and Dextools
For Tiger (TRC20) Liquidity added through SunSwap**

Tiger (CUB)

TRC20

GET STARTED WITH TETHER.

A global, open alternative to the current financial system

Tiger brings sound money to the world, Merchants and users are empowered with low fees. The future shines brightly with unrestricted growth, global adoption, permissionless innovation, and decentralized development.

Tiger uses peer-to-peer technology to operate with no central authority or banks; managing transactions and the issuing of Tiger is carried out collectively by the network (Blockchain). Tiger(CUB) is open-source; its design is public, nobody owns or controls Tiger(CUB) and everyone can take part. Through many of its unique properties, Tiger(CUB) allows exciting uses that could not be covered by any previous payment system.

WORKS EVERYWHERE, ANYTIME

Similarly to email, you don't need to ask recipients you're sending Tiger(CUB) to, you just need their Tiger(CUB) TRC20 wallet address and then you can transact with them anytime. The Tiger(CUB) network is always running and never sleeps, even on weekends and holidays.

www.tiger.us.org

info@tiger.us.org

OPEN TO ANYONE

Nobody controls or owns Tiger(CUB). There's no CEO, and you don't need to ask for permission to use it.

FAST INTERNATIONAL PAYMENTS

Sending Tiger(CUB) across borders is as easy as sending them across the street. There are no banks to make you wait three business days, no extra fees for making an international transfer, and no special limitations on the minimum or maximum amount you can send. Like the Internet itself, the network is always on. No transaction is too big or too small. And you never need anyone's permission or approval.

BE YOUR OWN BANK AND HAVE FULL CONTROL OVER YOUR MONEY

Banks can make mistakes, hold funds, freeze accounts, and otherwise prevent you from accessing your own money.

Banks can also decide to block your transactions, charge you fees, or close your account without warning. Tiger(CUB) gives you full, sovereign control over your funds, which you can access from anywhere in the world.

A SECURE DIGITAL CURRENCY WITH A KNOWN, FIXED SUPPLY

The Tiger(CUB) protocol ensures there will never be more than 100 billion coins in existence. Governments constantly print money out of thin air, endlessly inflating the supply and devaluing everyone's savings. Tiger(CUB) has a fixed supply and therefore represents sound money.

TRANSPARENT

All transactions are recorded on a global public ledger called the blockchain. The ledger is updated at regular intervals in blocks that are connected to form a chain. This allows anyone to easily see the full history of ownership and helps to eliminate the potential for fraud.

PSEUDONYMOUS

Identities are not tied to transactions. This helps to ensure that Tiger(CUB) remains free to be used by anyone, without censorship.

www.tiger.us.org

info@tiger.us.org

WHY CHOOSE TIGER ?

Our mission is to amplify your Defi experience

The Tiger(CUB) is being launched under the same plan that it will be the first most secure digital currency in the world, which will be used by people from all over the world, for payments and credits purposes. In which investors or various trading entities, Multinational Companies and Organizations, etc. will use Tiger(CUB) as a secure payment system.

Special care has been taken to make Tiger(CUB) 100% secure in every way. Its security features make it unique from other Cryptocurrencies.

The security features of Tiger include ownership renounced , liquidity locked , contract audited.

TIGER CORE FEATURES

Tiger Security is Permanent

Payments Driven and Decentralized Infrastructure

Tiger(CUB) is a fully decentralized peer-to-peer electronic system that does not rely on any central authority like a government or financial institution. As such, it represents a fundamental redesign of the very nature of money.

Fixed and Non-Mintable Supply

Only 100 billion coins will ever be created. This makes Tiger(CUB) a hard asset, like land or gold, providing an opportunity for people to store value in the digital realm over long periods of time.

Ownership Renounced

we have renounced ownership for security and no individual can change its parameters in future making it 100% safe to invest.

www.tiger.us.org

info@tiger.us.org

Liquidity Assets

Investors are the sole owners of the assets in the liquidity pool, to make Tiger(CUB) a 100% secure digital currency.

Developer Wallet

The Developer wallet holds majority of CUB'S for adding liquidity and organizing marketing efforts in return rewarding them with CUB'S and a transaction fee will be automatically deposited into developer wallet every time a transaction occurs.

Control Over Supply

No one can control the supply of Tiger tokens since only a fixed number of coins 100 billion are minted and ownership renounced.

Control Over Liquidity Pool

Tiger tokens are locked in liquidity pool to stabilize the price and prevent abnormal price fluctuations thus safe gaurding the investors money in LP.

Smart Contract Audited

Tiger (CUB) smart contract is audited and the ownership has been renounced, all the functions in Tiger(CUB) contract are designed to make Tiger (CUB) 100% the most secure digital currency.

Ultra-low processing fee

Tiger(CUB) brings sound money to the world, Merchants and users are empowered with low fee.

Tiger above-described core features make it both a long-term store of value and a highly effective medium of exchange.

www.tiger.us.org

info@tiger.us.org

TIGER ECOSYSTEM

What is Tiger used for ?

Thanks to its low transaction fees and fast confirmation times, there will be a growing number of use cases for Tiger(CUB). These range from DApps that integrate Tiger(CUB) payments, to social networks and Healthcare platforms that allow you to tip using Tiger.

There are several use cases of Tiger(CUB), but we will focus on some of the financial-related cases.

INTERNATIONAL PAYMENTS

Tiger can make international payments faster and cheaper. Since Tiger(CUB) is not issued by a central authority and is effectively borderless, you can bypass the several intermediaries needed to process the transaction. Transactions can happen on the same day safely and securely without any verifications by any central authorities, Banks, etc.

ALTERNATIVE BANKING AND WORLDWIDE PAYMENTS

A decentralized financial system democratizes finance and gives the unbanked access to services that a traditional financial institution would deny based on existing standards. In emerging markets, those outside the banking ecosystem are using mobile phones to access cryptocurrencies, as it's a viable alternative to a bank account and a way to protect their money from hyperinflation.

INVESTMENTS

Tiger has a limited and finite supply of coins, giving it the ability to keep inflation low. This stipulation encourages some retail and institutional investors to view Tiger CUB as a store of value and invest in it as a form of "digital gold."

LONG-TERM STORE OF VALUE

The total supply of Tiger(CUB) will never exceed 100 billion coins. This is written into the code that defines the Tiger(CUB) protocol.

www.tiger.us.org

info@tiger.us.org

As a decentralized network, Tiger(CUB) users ultimately decide how the protocol evolves - and since it is not in the interests of participants to dilute their holdings by changing the protocol, the 100 billion limit will almost certainly remain in place forever.

Tiger 'set-in-stone' supply schedule makes it unique among hard assets. By comparison, the supply of gold, although limited, is nevertheless subject to the forces of supply and demand. As the price of gold rises, more gold miners are incentivized to search for gold. This leads to an increase in the supply of gold, which places downward pressure on the price.

HIGHLY EFFECTIVE MEDIUM OF EXCHANGE

Tiger enables peer-to-peer payments between individuals – just like cash, but in the digital realm. Critically, fees for sending Tiger(CUB) typically amount to less than a penny per transaction, and settlement occurs near-instantly, regardless of the physical location of participants. This makes Tiger(CUB) useful for not only remittances and cross-border trade, but also for daily transactions like buying Groceries. Since the fees and transaction times are so low, Tiger(CUB) is also effective for micro-transaction use cases like coin reward for on time credit card due payments.

(DAPP & DEX) DECENTRALIZED EXCHANGE

In the future, we will build a decentralized swap and exchange (DApp), where Tiger(CUB) will be used as one of the key base assets as well as gas to be spent.
